

QUICK COMPENDIAL (QC) TESTING

5-DAY TURNAROUND TIME

RAW MATERIAL TESTING WITH NO SURCHARGE!

Acetone

Alcohol, Ethanol

Colloidal Silicon Dioxide

Crospovidone

Dehydrated Alcohol

Dextrose

Ethyl Acetate

Ethylparaben

Hypromellose

Isopropyl Alcohol

Lactose Monohydrate

Microcrystalline Cellulose

Potassium Chloride

Povidone

Propylene Glycol

Propylparaben

Simethicone

Sodium Acetate

Sodium Citrate

Sodium Hydroxide

Sodium Hypochlorite Solution

Sorbitol

Stearic Acid

Stearyl Alcohol

Triethyl Citrate

Pace Analytical Life Sciences offers five working day “Quick Compendial Testing” for certain routine USP and EP Materials at no additional costs. Reports and data packages – including worksheets, notebooks, chromatograms and instrument printouts – are provided within five working days of receipt through our 24/7 web portal, PacePort.

With Pace Analytical Life Sciences, you’ll get a partner who understands the unique requirements of your business and industry and can provide the technical expertise, innovation and world-class facilities that enable you to bring products to market faster while meeting all quality, health and safety standards.

Program/Sample Requirements and Limitations:

- Completed Analysis Request Forms (ARFs) requesting “Quick Compendial Testing” must be provided at least one day prior to sample receipt.
- Separate sample containers must be provided for chemistry and microbiology testing.
- Standard reports and data packages are available through PacePort. Reports/custom reports via mail or email are not included in this program.
- Microbial tests associated with a monograph will extend the reporting to (7) working days due to incubation. Method suitability must be performed prior to this service. The USP <71> Sterility Test is not included in the program.
