

STABILITY STORAGE AND ANALYSIS

Pace Analytical Life Sciences (PLS) provides stability protocols and analysis of samples using methods developed by PLS, your own scientific team and/or compendia method sources.

Pace Analytical (PLS) provides storage and analytical services for your cGMP stability programs. PLS offers long and short-term (accelerated) stability services for R & D and commercial products. Stability reports can be tailored to meet your needs.

All stability chambers are fully mapped and continuously monitored by a validated computerized (Datatron) monitoring system and have external back-up power.

PLS offers the following stability chambers for your use:

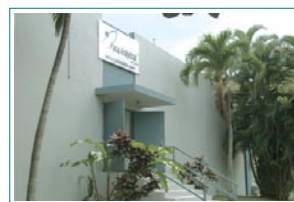

- 25°C/60%RH Chamber
- 30°C/65%RH Chamber
- 30°C/70%RH Chamber
- 40°C/75%RH Chamber

**Custom Chambers, including cycling, as needed.*

PLS operates a 40,000 square foot state-of-the-art facility located in the Minneapolis/St. Paul area. We are FDA registered, DEA registered, cGMP compliant and ISO/IES 17025 accredited.

Sample Receipt and Log-In, Document Reconciliation, Stability Protocols, and Data Tracking and Trending are maintained by dedicated stability personnel.
