

**WHEN ENVIRONMENTAL DISASTER STRIKES...**  
The PACE RAPID RESPONSE TEAM (PRRT) is there to help.

When disaster strikes – be it a major fire, a train derailment, an oil spill or a pipeline rupture – and materials of environmental concern are released to the environment, Pace Analytical's Rapid Response Team is available to discuss urgent environmental options and implement a testing solution. PRRT responders are available 24-7 to ensure that sample containers are available, samples are collected appropriately, critical samples are expedited to the nearest laboratory, and rapid results are provided to decision makers on the scene. This level of lab support is crucial in making decisions that impact the safety of emergency personnel on site and the potential exposure of local residents to hazardous chemicals.

**The PRRT can provide the following services and a flexible response to unique site challenges:**

- A national network of laboratories and responders
- Expedited shipment or courier of sample supplies to the scene
- On-site technical support and sample logistics
- Rapid laboratory results to support tactical decisions
- Automated, on-line, easy to use data management tools
- Quality data at all times to ensure defensibility should legal challenges arise

**The PRRT has extensive experience in a wide range of environmental disaster assistance including:**

- Derailments
- Fires
- Pipeline breaks
- Industrial chemical spills or leaks
- Floods and other natural disasters (*\*Pace Analytical can provide references for these types of work upon request.\**)
