Providing environmental testing expertise that meets today’s global demands for cleaner air, land and water.

WORKING TOGETHER TO PROTECT OUR ENVIRONMENT AND IMPROVE OUR HEALTH

Pace Analytical operates one of the largest full service commercial contract laboratory networks in the nation, providing project support for thousands of industry, consulting, engineering and government professionals. From our investment in laboratory facilities, technology, training and personnel to our extensive experience in environmental testing—we are dedicated to providing consistent, reliable analytical services and legally defensible test data for our clients.

Our clients can be confident that we will continue to operate in an environmentally sensitive and responsible manner, adhering to the most rigorous compliance and environmental protocols and requirements. Lasting success results from making smarter choices about our stewardship of the environment, managing our resources and fostering innovation to raise the level of health and well-being worldwide.

Our business and our environment are indelibly linked. Every day our employees demonstrate their commitment to a cleaner, more sustainable environment—one that supports a better, safer and healthier life for everyone.

Why Choose Pace Analytical?
• Nationwide Coverage / Locations and Certifications
• Full Service Environmental Capabilities
• Major Corporate Account Program: Total Geographic Coverage / National Certifications
• “One Stop Shop” Services: e.g., air toxics, aquatic toxicity, dioxin/furan analysis, low level mercury, radiochemistry and much more
• Federal and State Regulatory Knowledge
• Flexible Response to Demand
• Online Data Access and Management / PacePort
• On-time Delivery
• Innovative Test Reports and Specialized EDDs
• Single Point of Contact / Dedicated Project Management
• Customized Bottle Orders
• Convenient Courier Services
• Quality Systems Training, Audits (external and internal)
• Extensive Formalized Safety Program
• Continuous Staff Improvement Training for Process, Productivity and Performance

Our Commitment and Responsibilities
• Pace Analytical enjoys close working relationships with many prominent environmental consulting firms in the United States and maintains key supplier partnerships with several of the nation’s major industrial organizations. This enables us to work closely with our clients to help them address emerging environmental issues and unique testing requirements.
• Our investment in state-of-the-art laboratories and highly trained personnel emphasizes our commitment to deliver positive customer experiences across all channels of our business. We are dedicated to providing not only the best in analytical testing services, but also the most reliable—and we are well-equipped to handle any project regardless of scope or complexity.

Superior Project Management Staff Support
• One of the most critical components to satisfying our clients’ expectations is the investment in our technical staff and project management team.
• Project planning is critical to producing quality results, on time delivery and fiscally responsible project management. We work closely with our clients’ personnel to coordinate the execution of all analytical project requirements from inception to final review. For convenience and consistency, we assign a dedicated point of contact to each client or program.

24/7 Online Data Management: PacePort
• PacePort is a powerful web-based data management and delivery tool designed specifically for our customers. PacePort provides clients with secure access to services and convenient online document and project management status to enable faster communications and quicker availability to job or project critical information—24/7. With up-to-the-minute access to data from your computer, you have a quick and reliable online repository to query, sort and manage all of your test information.

At Pace, we strive to deliver what our customers value most to help them succeed—integrity, reliability, technical expertise and market strength of a highly respected industry partner.

Scope of Services: Environmental Capabilities and Services
• Air Emission/Stack Testing
• Air Quality Monitoring
• Alternative Fuels, Ethanol and Bismass
• CERCLA and RCRA Support
• Consumer Confidence Reports
• Drinking Water (SDWA)
• Bottled Water (BWBA)
• Ecological Risk Assessments
• Environmental Impact Studies
• Federal Program Support, DOE, DOE and USACE
• Groundwater Monitoring
• Hazardous Waste Characterization
• Landfill Monitoring
• MACT, NSERAP, NSPS and Title V Support
• Hydraulic Fracturing Services (Analytical)
• Mining Services (Sampling & Analytical)
• Permitting and Compliance Monitoring
• Property and Manufacturing Site Investigations
• Commercial Real Estate Transactions
• Remedial Investigation and Feasibility Studies
• Treatment System Evaluation and Optimization
• Toxicity Reduction Evaluation Studies
• Underground Storage Tank Analysis
• Wastewater/Stormwater NPDES Monitoring
• Leak Detection & Repair (LDAR)

Certiﬁcations and Experience
All Pace Analytical environmental testing laboratories are NELAP certiﬁed. Pace Analytical Life Sciences operations are FDA registered, DEA registered (Class II - V) and GMP compliant. Pace Analytical Life Sciences (Oakdale site) and the Metrology Operations of the LabOps Division are ISO 17025 accredited. The LabOps Division is ISO 9001:2008 certified.

Pace Rapid Response Team (PRRT): Emergency Disaster (Analytical Support Services)
When disaster strikes—be it weather-related, a major ﬁre, a train derailment, an oil spill, a pipeline rupture or a chemical spill—and materials of environmental concern are released to the environment—Pace Analytical’s Rapid Response Team is available to discuss urgent environmental options and implement a testing solution and ongoing analytical support.

PRRT responders are available 24/7 to ensure that sample containers are quickly available, samples are collected appropriately, critical samples are expedited to the nearest laboratory, and rapid results are provided to decision-makers on the scene. This level of lab support is crucial in making decisions that impact the safety of environmental personnel on-site and the potential exposure of hazardous chemicals to local residents and surrounding communities.

The PRRT provides the following services and a ﬂexible response to unique site challenges:
• A national network of laboratories and responders
• Courier of sample supplies to the scene
• Expedited shipment services (Couriers and Pace corporate aircraft available)
• 24/7 laboratory staffing and data reporting
• On-site technical support and sample logistics
• Rapid laboratory results to support tactical decisions
• Quality data at all times to ensure defensibility; Litigation support
• Automated, on-line, easy to use data management tools

The PRRT has extensive experience in a wide range of environmental disaster assistance:
• Debris
t• Fires
• Oil/Water Fires
• Pipeline breaks
• Industrial chemical spills or leaks
• Hurricanes, floods and other natural disasters
